

Last Update: 7/1/21

Future-proof I/O. And you need to be on top of your game to know how to select the right I/O technology for the solutions you are building for your customers.

Marvell's HPE Team of I/O experts will be conducting a series of 20-30 minute "Coffee Talk" sessions on discussing how FastLinQ Ethernet and QLogic Fibre Channel I/O for HPE can differentiate the solutions you are deploying today.

These are short, to the point presentations to enable you to increase your understanding of I/O technology available for HPE Server, Storage, and Networking solutions. Remember, I/O connectivity is required in every server and storage opportunity. Now is your chance to stay ahead of the competition and be a better trusted advisor to your clients. Here's the list of upcoming webinars. Register today!

Date/Time	Topic	Registration Link
July 13, 2021 11-11:30AM ET	Tools, Resources and Utilities for HPE and Marvell I/O Technology - In this Coffee Talk, you will get a short overview of how to use some of the key tools and utilities available to help selecting Marvell/HPE IO technology easier. We will also showcase where to find key resources as well. Don't miss this guided tour of HPE-specific tools and resources that will make your job selecting IO adapters easier.	Register Here
July 27, 2021 11-11:30AM ET	Comparing Adapter Generations – In this Coffee Talk session, we will compare capabilities of 578x0 vs QL41000 series Ethernet and SN1600Q vs SN1610Q Fibre Channel adapters. This will help you make a more educated choice as to the family of adapters within the HPE/Marvell portfolio to recommend to your customer based on their IO needs.	Register Here
Aug 10, 2021 11-11:30AM ET	NS204 Boot Device Update - This session will provide info latest info/refresher on HPE Boot Devices for HPE ProLiant and Apollo servers. This will include reviews of the NS204i-p Boot Device for HPE ProLiant Gen10/Gen10 Plus servers, the NS204i-t Boot Controller for select HPE Apollo servers and the NS204i-r Boot Device for select HPE ProLiant Gen10 Plus servers. Aug 24, 2021 11-11:30AM ET	Portfolio Refresher – This short Coffee Talk will provide a refresher on all the Marvell products and technology in the HPE portfolio. This will include reviewing the IO offerings and where Marvell technology is used elsewhere in HPE Server, Networking and Storage products and solutions. We will also highlight where resources for all of these are available.	Register Here
Sep 7, 2021 11-11:30AM ET	Fibre Channel or iSCSI? – For storage connectivity, it's not always which is the better technology, but sometimes comes down to what is best for your client's particular environment. Marvell I/O experts will compare both approaches for connecting servers to shared storage arrays.	Register Here
Sep 21, 2021 11-11:30AM ET	Port Isolation Architecture – While all Fibre Channel HBAs adhere to the same standards and are interoperable with one another, there are key differences that can prove to be significant for your clients. In this Coffee Talk, Marvell I/O experts will discuss the benefits of the port isolation architecture used in HPE Fibre Channel HBAs from Marvell.	Register Here

Oct 5, 2021 11-11:30AM ET	FCP (SCSI) vs FC-NVMe – In this Coffee Talk, Marvell experts will discuss the difference between legacy Fibre Channel connectivity using SCSI commands versus the next-generation Fibre Channel SAN that runs NVMe storage commands.	Register Here
Oct 19, 2021 11-11:30AM ET	SAN Congestion Mitigation – With faster NVMe storage connected to the SAN, congestion becomes a potential issue. In this Coffee Talk, Marvell I/O experts will explore new capabilities in the FC SAN that enable HBAs and Switches to share information on potential congestion issues using Fabric Performance Impact Notification (FPIN) communications.
