

Port Isolation on QLogic® Fibre Channel HBAs

FC and FC-NVMe

PORT ISOLATED ARCHITECTURE

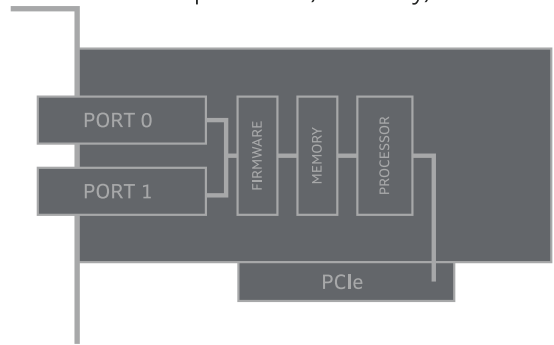

Isolated processor, memory, and firmware

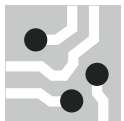

Available models
16Gb FC: SN1100Q
32Gb FC: SN1600Q, SN1610Q

Competitor's Architecture

Shared processor, memory, and firmware

#1 IN FIBRE CHANNEL HBA UNITS SOLD WORLDWIDE

More Predictable Per-port Performance

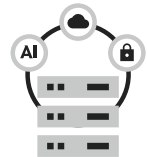

More IOPs per CPU%

Lower Latency and Lower CPU Utilization

High performance for SAN environments

Greater Reliability, High Availability

Customers need the highest uptime and want the most reliable design
